Product 1: TTP: 2 GB Pen with Binder

Talking Tactile Pen!

Now taking orders for the newest thing in accessible graphics: Touch Graphics/SKERI Talking Tactile Pen. The pen is a "description probe" for tactile graphics, affording people who can't see well with unprecedented access to images. Tap the stylus point on any object on a map or diagram to hear layered information about that thing. Or, play a 3D board board game, and run other apps that use pen's the on board computer to run programs with rich interactivity, like Sudoku, a scientific calculator, periodic table, transit maps with embedded schedules, museum audio guides including tactile exhibit maps, children's picture book with animal noises, and many, many others.

The Talking Tactile Pen is a collaborative project of Touch Graphics, Inc. and Smith-Kettlewell Eye Research Center, under funding from NIDRR and NSF.

Price: \$175.00
